

Tiling Checklist

- Is there any noticeable damage or stains on the flooring?
- Are there any cracked tiles that need to get replaced? If yes, inform the authorities and prepare for it.
- Check for any hollow sound in the flooring.
- Are all the tiles laid down properly? Are there any gaps between them?
- Are there any tile edges that look as if lifted?
- Check the grouting materials and see if there are filled-up joints.
- Is there an electricity and water line in every room?
- See if the grouting is complete and there are no crumbles on the flooring.
